

Changes in the number of children attending each fiscal year

(2009-2023)

A: ■ Making up a bipolar motor by every pupil and considering the principle of rotation in regular science classes at elementary schools

B: ■ Experimental classes other than motor making class in regular science classes at elementary schools

C: ■ Club activities at elementary schools

D: ■ Activities outside of elementary school

★) The decrease in the number of children around 2020 is due to the coronavirus pandemic.
